PROJECT

- **SAFAR-AI TRIP PLANNER**

Link: safarai.in

Technologies Used: **React, Firebase, Google Ai Studio, Gemini API, Tom-Tom API**

Description: Safar is an AI-powered trip planner that creates personalized travel itineraries using Google AI Studio and Gemini API, while integrating Tom-Tom API for navigation. It features a travel community for user reviews and recommendations, and allows seamless hotel bookings. Built with React and Firebase, Safar offers a user-friendly, scalable platform for modern travelers.

- **AI TRAVEL SOCIAL MEDIA AGENT**

Built an AI-powered agent that fetches random AI-generated trip plans from Firebase, uses Hugging Face's Mistral-7B model to craft luxury-themed social media captions, and automates posting to platforms like Twitter. Focused on dynamic personalization, emoji optimization, and strict character limits.
